Selective oxidation of glycosides

Manuel Jäger

Ph.D. Thesis

University of Groningen, The Netherlands

The research described in this thesis was carried out within the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

In compliance with the requirements of the Graduate School of Science of the Faculty of Mathematics and Natural Science, University of Groningen, The Netherlands.

This research has been performed within the framework of the CatchBio program. The authors gratefully acknowledge the support of the Smart Mix Program of the Netherlands Ministry of Economic Affairs and The Netherlands Ministry of Education, Culture and Science.

Selective oxidation of glycosides

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans

This thesis will be defended in public on

Friday 26 June 2015 at 9:00

By

Manuel Jäger

born on 26. October 1982
in Oelde, Germany

Supervisors

Prof. A. J. Minnaard

Prof. J. G. de Vries

Assessment committee

Prof. P. H. Seeberger

Prof. B. L. Feringa

Prof. W. R. Browne

Für Anja

Table of Contents

Chapter 1 - Regioselective Modification of Carbohydrates	1
Introduction	2
Structure and nomenclature of glycosides	5
Selective protection of glycosides	6
Inherent reactivity of glycoside hydroxyl groups	7
Tin mediated protection of glycosides	9
Metal- and metalloid-mediated protection of glycosides other than tin	12
Biomimetic and stereoselective catalysis in glycoside protection	13
Enzyme-catalyzed protection of carbohydrates	15
Selective non-protective modification of carbohydrates	16
Halogen introduction	17
Deoxygenation and epimerization of glycosides	19
Selective oxidation of carbohydrates	20
Chemical oxidation of glycosides	20
Enzymatic oxidation of carbohydrates	22
Aim and Outline of this thesis	24
Aim	24
Outline	25
Literature	26
Chapter 2 - Catalytic Regioselective Oxidation of Glycosides	31
Introduction	32
Goal	33
Results and discussion	34
Substrate Scope	35
Possible Mechanism	38
Synthesis of methyl allopentopyranoside and aminoglucoside	40
Conclusion	40
Experimental Section	41
Literature	51
Chapter 3 - Catalytic Regioselective Oxidation of Partially Protected Glycosides	53
Introduction	54
Selective alcohol oxidation	54
Goal	56
Synthetic approach	58
Results and discussion	60
Substrate synthesis	60
Oxidation	61
Isolation and purification	62
On the regioselectivity of the oxidation	63
On the reaction rate of the oxidation	64
Chemical shifts in NMR as indication for electron density	65

Conclusion	70
Experimental Section	72
Acknowledgements	80
Literature	81
Chapter 4 - Selective Oxidation and Modification of Aminoglycoside Antibiotics	83
Introduction	84
Structure of aminoglycosides	84
Mode of action of aminoglycoside antibiotics	86
Bacterial resistance against aminoglycoside antibiotics	87
Aminoglycosides as RNA binders	90
Total synthesis of aminoglycosides	90
(Selective)-modification of aminoglycosides	91
Goal	95
Results and discussion	95
Global amine protection of aminoglycosides	96
Oxidation of the amine-protected aminoglycosides	98
3'-Keto-aminoglycosides as antibiotics	101
Selective modification to 3'-epi-aminoglycosides	101
Deprotection and final purification	103
Targeting two mechanisms of bacterial resistance against aminoglycoside antibiotics	106
Conclusions and future perspectives	110
Experimental Section	112
Acknowledgements	129
Literature	130
Chapter 5 - Future Perspectives in the Selective Oxidation of Glycosides and Aminoglycoside Antibiotics	135
Introduction	136
Catalytic system	136
Deuteration as protection	138
Is this catalyst unique?	143
Substrates for the selective oxidation	146
Glucosides	146
Natural sweeteners	147
Aminoglycosides	149
Origin of the regioselectivity	149
Conclusion	151
Experimental Section	151
Literature	155
Samenvatting	156
Summary	161
Acknowledgements	161
